## SEALERS

ACR1 Gloss

**Gloss Acrylic Sealer:**

ACR1: Enhances the beauty of the stone, resists salt, chloride and makes graffiti cleanup easier. Gives the stone the "wet look." Two coats applied. A solvent base gloss sealer, used mainly on EX finishes (exposed aggregate), produces deep rich colors in the aggregate. Also available on SB finishes by special order.

ACR2 Non-gloss

**Non-Gloss Acrylic Sealer:**

ACR2: Water Base Non-gloss sealer. Clear penetrating, non-visible, water repellent sealers can be used when gloss finish is not desired. Two coats applied. Used on EX and SB finishes to provide protection against the elements.

ACR3 Semi-gloss

**Semi-Gloss Acrylic Sealer:**

ACR3: Water base semi-gloss sealer used on EX and SB finishes (sandblast) to enhance and deepen the color of the finish it is applied.

**Special Finishes**

Special finishes contain pigments, white cement or special aggregate that are transported from out-of-state. Extra charges are based on material, batch size and quantity. Prices are quoted on a per-job basis. Call for more info.

**Concrete Stains**

Available in a variety of colors, call for more info.

**All Doty and Sons products are steel-reinforced.**

Reinforcing is positioned at least 1" away from outside surfaces.

**Concrete Specifications:**

**Sand:** washed torpedo sand. Stone: 3/8" washed gravel.

**Cement:** very light gray color 7 to 7 1/2 bags per cubic yard. Water reducers used to increase strength and durability. Chemically entrained air (6-8%) causes concrete to be salt and chloride resistant. Average strength (after 28 days) - 5000 PSI. Concrete cured indoors under plastic cover before exposure to outside air. Meets ASTM specifications.

**Doty & Sons commitment to quality** starts with top grade materials and continues with extra steps that other manufacturers don't take. All Doty & Sons lids, doors and component hardware use top quality steel (cold rolled steel on lids and doors). All parts are zinc dichromate plated for extra protection. Lids and doors are then powder coated with polyester powder paint. Powder Coat Paint is a polyester powder that is electrostatically applied to the lid, door, or dome; then baked to 450 degrees. Hinged Lid Specifications: Heavy Duty 11 gauge steel with 10 gauge hinge permanently attached with 7 separate welds. Security cable assembly limits lid opening. Hinge is fastened to container with four stainless steel cap screws. Steel lids are preferred because steel is the strongest, yet it has the least salvage value and not likely to be stolen for scrap.

## EXPERIENCE

Doty & Sons Products, Inc. has been in the precast concrete business since 1948. We make top quality products that give years of use and are appealing to the eye. Most of these products are our own design, planned for looks, comfort, strength and durability. Because of their heavy weight, they resist vandalism. Products are made of extra strong 5000 PSI reinforced concrete; the exposed aggregate finish has the stones all the way through, nothing is glued on. Many of the products shown in this brochure are stock items and can be delivered in a short period of time. We can provide different aggregates and finishes to match individual projects. We work with architects, planners and city officials to design new or alter existing products to meet their needs. We welcome the opportunity to work with you on your upcoming project.

## PRODUCT WARRANTY

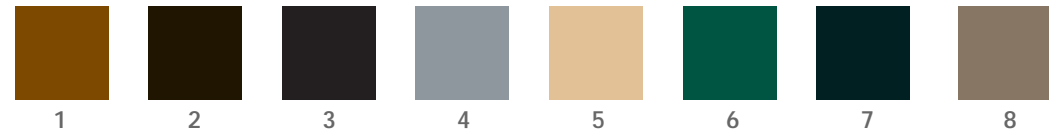

Concrete products manufactured by Doty & Sons carry a two year limited warranty from the date of purchase. Metal and plastic dome lids and inner liners carry a one year limited warranty from the date of purchase. For more detailed warranty information please call 1-800-233-3907.

INDIVIDUAL SPECIFICATION SHEETS ARE AVAILABLE FOR ALL ITEMS, CALL 1-800-233-3907.

*We reserve the right to make product improvements and material or design changes without notice.*

**SEALERS**

ACR1 Gloss

**Gloss Acrylic Sealer:**

ACR1: Enhances the beauty of the stone, resists salt, chloride and makes graffiti cleanup easier. Gives the stone the "wet look." Two coats applied. A solvent base gloss sealer, used mainly on EX finishes (exposed aggregate), produces deep rich colors in the aggregate. Also available on SB finishes by special order.

ACR2 Non-gloss

**Non-Gloss Acrylic Sealer:**

ACR2: Water Base Non-gloss sealer. Clear penetrating, non-visible, water repellent sealers can be used when gloss finish is not desired. Two coats applied. Used on EX and SB finishes to provide protection against the elements.

ACR3 Semi-gloss

**Semi-Gloss Acrylic Sealer:**

ACR3: Water base semi-gloss sealer used on EX and SB finishes (sandblast) to enhance and deepen the color of the finish it is applied.

Due to variations in photographic reproduction colors may not match actual products. Actual sample can be provided upon request.

**All Doty and Sons products are steel-reinforced.**

Reinforcing is positioned at least 1" away from outside surfaces.

**Concrete Specifications:**

**Sand:** washed torpedo sand. Stone: 3/8" washed gravel.

**Cement:** very light gray color 7 to 7 1/2 bags per cubic yard. Water reducers used to increase strength and durability. Chemically entrained air (6-8%) causes concrete to be salt and chloride resistant. Average strength (after 28 days) - 5000 PSI. Concrete cured indoors under plastic cover before exposure to outside air. Meets ASTM specifications.
